EDUCATION

B.Tech
Lovely Professional University, Phagwara

07/2018 – Present   *8.37*

Courses
- Computer Science and engineering

12th
M.L.S.M College, Darbhanga

06/2017 – 06/2018   *72.80%*

10th
D.A.V. public school, Saramohanpur, Darbhanga

06/2015 – 06/2016   *9.6*

PERSONAL PROJECTS

Domestic Cricket Management System (05/2018 – 06/2018)

- This project is totally based on Java Language and is made in android studio. It is basically made for managing the cheating which happens in gully cricket. In this project I have made many modules like stump out, run out, low catch and lbw which will help us to know whether the player is out or not out . First of all video should be recorded through mobile and the application automatically detect that in which module it should be passed and from there we can see that whether the player is out or not out by continuously referring to the video.

My Website (04/2019 – 05/2019)

- This project is based on website development. Basically, it is simple website portfolio. In this for front-end HTML & Bootstrap is used and for back-end PHP is used. User can easily get notes and youtube reference from this website.it is very helpful for engineering student to gather notes.

Auditorium Ticket Booking System (09/2018-12/2018)

- This was very interesting c++ project in which we created a smart ticket booking system for our college auditorium.In this project I used various libraries of c++ like graphics,opencv for showing seat to the customer and if someone book the seat the same seat can not further be booked. The ticket can also be cancelled later on by giving mobile number which was given at time of booking.

SKILLS

C++ Python Java HTML DBMS Data Structure

CLASS REPRESENTATIVE

DAV public school, Saramohanpur, Darbhanga (06/2015 – 06/2016)

PARTICIPATION & ACHIEVEMENTS

Participated in a workshop of Bug Bounty and open source computing
Lovely Professional University

Participated in ISCA2019 (01/2019 – 01/2019)
Lovely Professional University

TRAINNING & CERTIFICATES

Android App Development with Java (12/2018)
Udemy

Ethical Hacking (09/2018)
LPU Cyberhack community

Training in Core Java (12/2019)
Edureka

Python for Data Science (09/2019 – 11/2019)
Nptel
